

**Live freeze-dried vaccine,  
PHY.LMV.42 and Massachusetts  
H120 strains**

**For the active immunization of chickens against  
Newcastle Disease and Infectious Bronchitis**

### ► COMPOSITION

**CEVAC® VITABRON L** contains the PHY.LMV.42 strain of Newcastle Disease virus and the Massachusetts H120 strain of Infectious Bronchitis virus in live, freeze-dried form. The embryonated hen eggs used in the production of the vaccine are obtained from specified-pathogen-free (SPF) flocks.

### ► INDICATIONS

For the active immunization of healthy chickens against Newcastle Disease and Infectious Bronchitis.

### ► ADMINISTRATION AND DOSAGE

Primary vaccination should be carried out with **CEVAC® VITABRON L** by spray or eye-drop method as from the first day of age.

### ► SIDE EFFECT

Rarely, catarrhal respiratory symptoms may occur on day 3 to 6 following vaccination but disappear in a few days.

### ► STORAGE

- Store vaccine between +2°C and +8°C or 35°F and 45°F
- Protect from light

### ► PACKAGED

1,000 and 2,000 dose vials  
20 x 1,000 dose vials / box  
20 x 2,000 dose vials / box

### WARNING

**Newcastle Disease virus may cause a mild inflammation of the eye in humans which lasts for two or three days. Care should therefore be taken when handling the virus to avoid contact with the eyes.**
